DETAILED ACTION

This office action is in response to the amendment filed on September 7, 2007.

Claims 4-9 and 60-65 are pending in this application.

Withdrawn Rejections/Objections:

Applicant is notified that any outstanding rejection/objection that is not expressly maintained in this office action has been withdrawn or rendered moot in view of applicant's amendments and/or remarks.

The following rejections are under new grounds:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 8, 60 and 64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4 and 8, the recitation "R⁴ or R⁵ is acyl containing group, and the other is H, ..." is confusing. It is suggested that the phrase be replaced with – one of R⁴ or R⁵ is acyl containing group, and the other is H, ... --.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 5 and 61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grant et al., WO 02/12198 (published February 14, 2002). The reference teaches pyrimidine-4-amine compounds that are structurally analogous to instantly claimed compounds. See the compounds represented by structural formula (II) disclosed in page 6 and the corresponding species, e.g., compound 44 in Table IV (page 48) (structural formula of compound 44 depicted below for convenience). The compounds are taught to be useful as pharmaceutical agents, see the abstract.

The instantly claimed compounds differ from the reference compound by having R¹ as alkyl, e.g., methyl, in place of H for the reference compound. Therefore, the instantly claimed compounds differ from the reference compounds by being H vs. CH₃ or by a -CH₂ group and it is well established that compounds that differ by a -CH₂ group are structural homologs. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the reference compounds to prepare the structural homolog. One having ordinary skill in the art would have been motivated to prepare the instantly claimed compounds because such structurally homologous compounds are expected to possess similar properties. It has been held that compounds that are structurally homologous to prior art compounds are *prima facie* obvious,

absent a showing of unexpected results. *In re Hass*, 60 USPQ 544 (CCPA 1944); *In re Henze*, 85 USPQ 261 (CCPA 1950).

Allowable Subject Matter

Claims 6-7, 9, 62-63 and 65 are allowed. Claims 4, 8, 60 and 64 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
